About Our Horse Safaris

Prices Valid until October 2027

**Please contact us to discuss any personalized safaris.*

While our horseback safaris are a relatively recent addition, horses have always played an important role on this 12,000-hectare property — from anti-poaching patrols to being cherished by the children raised here over the years. The land was rewilded over 35 years ago, transitioning from cattle ranching to a thriving wildlife reserve.

We offer English-style riding, blending bush tracks with relaxed canters along open roads. Our experiences include overnight mobile safaris where guests camp at a waterhole blind, complete with toilets, showers, and stretchers, while horses are long-lined nearby. We also have a more rustic, but beautiful camp site along a scenic ridge with long drop toilets and bucket showers.

What sets us apart is our flexibility for all rider levels. Our horses are gentle and well-suited to beginners, allowing for slow, wildlife-rich rides (thanks to the absence of dangerous game). More experienced riders can enjoy faster-paced outings and even try out our rustic, African-style cross-country course.
